## Performance specifications

GE's HC-PC-SVR2 series of servers are specifically configured to meet the server requirement of Telergy and ProCare Connect software applications. From its Windows Server 2003 operating system to the SQL Server database design, the HC-PC-SVR2 series will reliably support the critical database and integration applications as well as the storage-intensive Telergy and ProCare Connect Management Reporting software (ARMSip).

GE Healthcare has standardized on Dell® 2900 Servers. To guarantee proper Telergy and ProCare Connect system performance HC-PC-SVR2-PC2900, HC-PC-SVR2-T2900, HC-PC-SVR2-T2910, or other GE Telergy or ProCare Connect certified servers must be used. Servers can be sourced directly from Dell using GE Healthcare ordering information but would have to be configured by the user. The user bears all responsibility for using non-certified servers.
