

AVIGILON

Analog Video Encoder with High Definition Stream Management (HDSM)

Key Features

- Flexibility
- High Image Rates
- High Definition Stream Management (HDSM)
- PTZ Support
- Alarm Input and Outputs
- Power-over-Ethernet (PoE)
- Plug-and-Play
- Easy to Install
- Audio Recording

Benefits

- Supports NTSC and PAL video standards and Composite, Component, and S-Video formats
- Record up to 30 IPS at 4CIF resolution from each port for a total of 120 IPS from all 4 ports
- Highest possible quality recording with no loss of data and dynamically controlled bandwidth utilization for optimal streaming
- RS-485 Port available for controlling standard PTZ units within Avigilon Control Center
- Synchronize recording with external alarms and integrate camera motion detection into your current alarm system
- No external power required for the encoder
- Auto-detection and auto-configuration of encoders for easy installation
- Rackmount kit allows 3 encoders, for a total of 12 analog cameras in 1U of rackspace
- Record high quality audio from any line input or microphone source

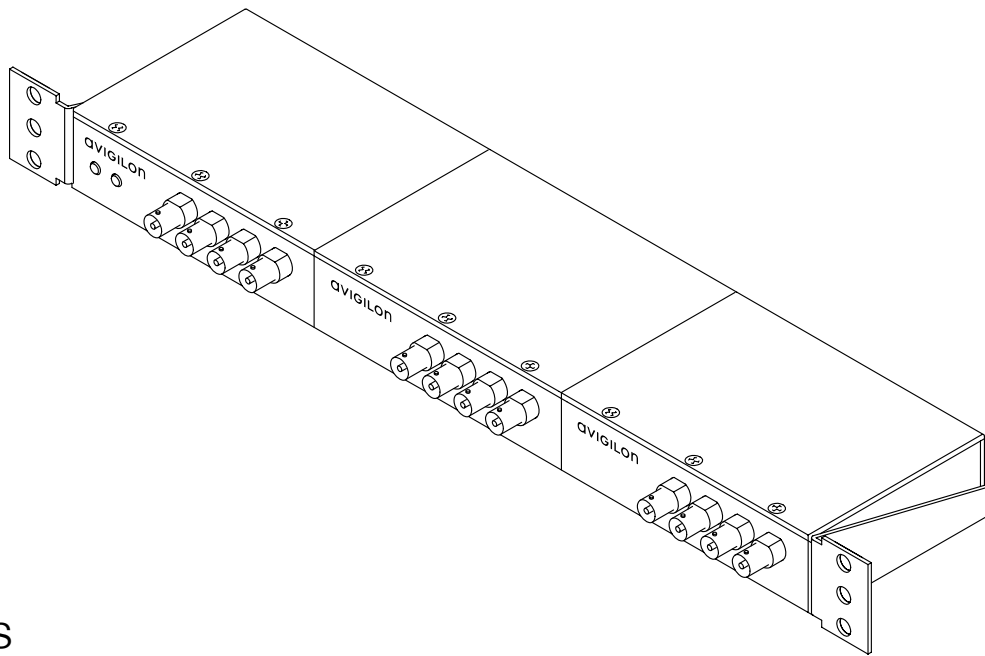

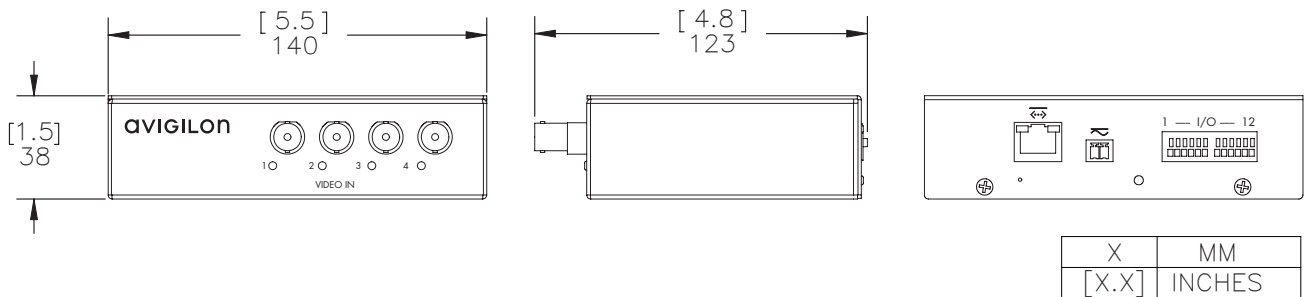

Analog Video Encoder with High Definition Stream Management (HDSM)

Model	Pixel Layout	Maximum Images Per Second	Number of Ports	Video Standard	Image Type	Audio Inputs	Recommended Application
ENC-4PORT	up to 768 x 576	120 ips	4	NTSC or PAL	Color or Mono	0	Integrating legacy analog cameras into an Avigilon HD Surveillance System
ENC-4PORT-2AI	up to 768 x 576	120 ips	4	NTSC or PAL	Color or Mono	2	Integrating legacy analog cameras into an Avigilon HD Surveillance System while recording two independent audio channels

1U Rackmount Bracket (Model: ENC-BRK1U)
