

Need Flexibility?

imagination at work

The Answer is in

When it comes to patient care, there's simply no room for compromise. But it's nice to know there's plenty of flexibility built right into your nurse call system.

Introducing Telligence™ from GE.

The hectic pace at which you and your caregiving peers work would leave most nine-to-fivers panting in your wake. With patients to attend, documentation to maintain, and calls to answer, the last thing you need is a patient-staff communications system that gets in your way.

The first time you use the Telligence system, you'll be hooked. Telligence supports you no matter how frantic the pace becomes. Telligence works along side you, clearly communicating patient requests and prompting action when it's needed, then receding quietly into the background when it's not. The secret: an unparalleled combination of sophisticated technology and elegant usability. Sounds simple. But it's not. The fact is, Telligence represents a whole new way to think about nurse call systems.

Patient Room Challenges?

- **Telligence** delivers crystal clear intercom between patients and staff using the latest in Voice-over-IP (VoIP) technology and GE's exclusive *HearingAid™* automatic audio controls.
- Exclusive *NiteLite™* feature enhances patient safety and simplifies system operation, making stations easier to locate and use in low light settings

Looking to improve patient satisfaction?

- **Telligence** provides a level of usability that virtually eliminates the learning curve for day-to-day functions, so you can allocate more of your resources to patient care instead of staff training.
- **Telligence** expedites staff response to patient calls by automatically delivering information directly to assigned staff's mobile messaging devices, like pagers and phones.

Telligence™!

Unique nursing unit requirements?

- **Telligence's** revolutionary *Infinity™* Dome Light, with its exclusive multi-color LED design, lets you decide how each nurse call event is displayed, making it easy to distinguish between sentinel events and routine calls. It can even be set up to match dome lights in existing areas.
- Only **Telligence** unleashes the power of *Choice™* Programmable Technology, putting you in control of each room with fully customizable station buttons and patient monitor alarms.

Frustrated by complicated software?

- **Telligence** offers a suite of easy-to-use software applications that coordinate all of the most critical nurse call and communication activities including:
 - Staff Assignments
 - Wireless Messaging
 - Management Reporting
 - Real-Time Electronic Whiteboard
 - Map and List views of call activity

Telligence is scalable and equally suited to large and small applications, new construction and renovations. **Telligence** knows no boundaries – you make the rules. It can even leverage your previous investment in earlier ProCare systems, operating side by side, while still supporting the latest in system integrations and other high-end features.

Flexibility is in **Telligence**.

Telligence represents the new shape of nurse call. Don't be left behind. Contact your GE Security representative today.
