

IDentiPASS™

Superior access
control systems
for expanding
technologies

Expanding the boundaries of access control.

Feature-rich and packed with advanced capabilities, IDenticard access control systems are simpler and more powerful than ever before. Our family of premier access control products, IDentiPASS™, is known industry-wide for its flexibility, versatility and ease of use. You can rely on

IDenticard for superior solutions at an affordable price.

Access control designed for integrated security management

IDentiPASS PLUS provides a sophisticated level of security for a rapidly changing world.

Customers benefit from the advanced security provided by biometric readers, relay-controlled devices and other access control equipment.

For businesses relying on integrated security solutions, IDentiPASS PLUS offers unrivaled versatility. It can be integrated with time and attendance systems, used with paging and CCTV, and interfaced with digital video recording equipment. In fact, you can control external security equipment with IDentiPASS PLUS simply by activating its device drivers.

IDentiPASS PLUS is an intelligent decision maker and a capable communicator. Its advanced command and control features enable you to monitor and control the readers, relays and door position of each door in the system, or all doors simultaneously. If security has been breached anywhere in the system, IDentiPASS PLUS will show you precisely where and when in an instant with its optional innovative mapping module. And a one-click command activates immediate lockout of any or all doors.

With its versatile features designed to harness the power of today's sophisticated security technologies, IDentiPASS PLUS is the ideal choice for your access control needs.

Around the corner or around the world

Our standard IDentiPASS system is an ideal solution for facilities of all sizes – from small independent businesses to Fortune 500

companies. This system's superior networking capabilities offer many options for system monitoring, as well as control and database maintenance from multiple locations. With concise, understandable commands, the IDentiPASS system's modern, multitasking capabilities allow you to use the same PC that operates your security program to run other applications you need. Our customizable screen layout makes it easy to graphically manage your information.

Unsurpassed value in powerful access control

IDentiPASS LT is our most economical introduction to Windows-based access control. It can be specifically tailored

to meet the access requirements of up to 6,000 cardholders. IDentiPASS LT offers many of the same sophisticated features as IDentiPASS, such as autodial capability for Series 9000™ Panels and the global linking of any transaction or event to actuate any relay or relay group, device driver, WAV file, bitmap, alarm acknowledgement, or alarm group anywhere in the system. IDentiPASS LT can be upgraded easily to IDentiPASS or IDentiPASS PLUS.

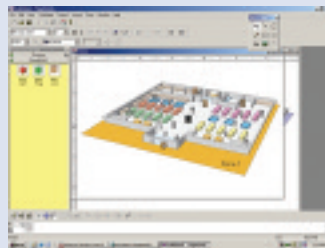

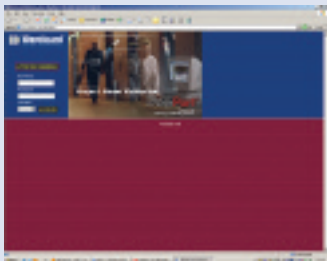

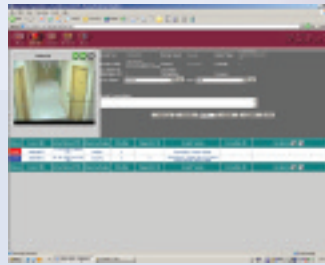

Key Features within the IDentiPASS product series:

- Scheduled history archiving
- Virtually unlimited access groups assigned to cardholders
- Flexible door and door group configurations
- Copy cardholder data to a new card number
- View cardholder event links in cardholder records
- Card activation and expiration date settings
- Set a relay group to a specific reader for elevator control
- Powerful report capabilities
- Up to 64,000 cardholders per panel

Advanced command and control

IDentiPASS, IDentiPASS Plus and IDentiPASS LT products all offer PASSPort – Powered by Ortega. With this dynamic mapping module, you can monitor and control alarms, relays, doors, and alarm acknowledgements through a floor plan/graphic map interface. The user interface to this advanced technology is a standard web browser. And you can view live video from IP addressable cameras. In IDentiPASS PLUS and IDentiPASS, PASSPort provides digital video recorder (DVR) integration by linking DVR action to system events and transactions.

PASSPort features by system

Feature	IDentiPASS PLUS	IDentiPASS	IDentiPASS LT
